

Corrugated Rainscreen

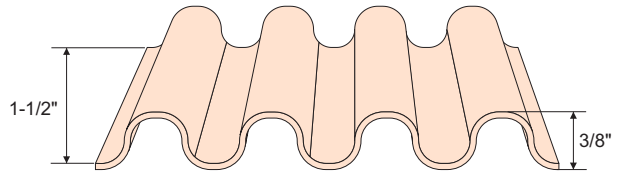

DESIGN FEATURES

An extruded pvc furring system that is 1-1/2" wide. It's flexible nature allows it to be rolled instead of being a strip, easing installation. The corrugated pattern allows for cross ventilation, and when combined with VSZ and VST it creates a vented rainscreen.

MATERIAL

Extruded rigid PVC, industry-standard, durable, chemically resistant product designed for outdoor weatherability.

WARNING: Use light or pastel paint colors only on Tamlyn PVC or Sherwin-Williams Vinyl Safe™ Paint. Use of dark color paint will cause deformation. Tamlyn vinyl products are not warranted if painted with dark color paint.

ITEM ID	RAINSCREEN SIZE	LENGTH
