| ITEM ID | WIDTH | LENGTH | THICKNESS |
|---------|-------|--------|-----------|
| TDT3-75 | 3" | 75' | 20 mil |

XtremeDeckTape is a self adhering roof deck tape designed to cover seams and seal around roofing fasteners before underlayment is installed. As part of a complete roofing system, **XtremeDeckTape** helps reduce the risk of moisture related deck damage and supports a more durable roof assembly. **XtremeDeckTape** is strong, easy to apply, and water resistant. Its durable 20 mil construction is supplied in convenient 3 inch by 75 foot rolls for efficient jobsite coverage. Taping roof deck seams helps reduce the opportunity for water to reach the roof structure through joints and fastener penetrations.
